3.1 Environmental Project Brief

In pursuant to the Environmental Impact Assessment (EIA) Regulations, Statutory Instrument No. 28 of 1997, an Environmental Project Brief (EPB) for the Dolomitic / Limestone Quarry project at Mwachilinga / Shantumbu Area in Kafue District of Lusaka Province was submitted to Zambia Environmental Management Agency (ZEMA). Approval and issuance of Decision Letter is awaited.

3.2 Project Location and Access

The proposed project site of extent area approximately 79 hectares is located at Mwachilinga Village, Shantumbu Area in Kafue District of Lusaka Province of the Republic of Zambia. Location of the site is as described in Appendix 1 (1.2).

3.2 Relevant Legislation

3.2.1 Environmental Protection and Pollution Control Act, Chapter 204 (EPPCA)

The primary environmental legislation in Zambia is the "Environmental Protection and Pollution Control Act" (EPPCA) of 1990 and the Environmental Protection and Pollution Control (Amendment) Act of 1999. This legislation sets out a framework for Environmental Impact Assessments (EIAs) as well as establishing the Environmental Council of Zambia as a regulatory body charged with the responsibility of overseeing the implementation of the requirements of the environmental legislation.

Under the EPPCA, regulations have been issued setting out detailed requirements for environmental reporting in relation to new developmental projects like the one being proposed by Lu Hang Stone Mining Company Limited.

3.2.1.1 The Environmental Protection and Pollution Control (Environmental Impact Assessment) Regulations, 1997.

Relevance and Compliance

The legislation requires that any project developer for any new developmental project prepares an Environmental Project Brief (EPB), which is a report that includes preliminary predictions of possible impacts of a proposed project on the environment and constitutes the first stage of environmental impact assessment process. Once completed, the project brief should be submitted to the relevant authority for their review and assessment.

The preparation of this Environmental Project Brief (EPB) by the developer is in compliance with the requirements of the Environmental Impact Assessment (EIA) Regulations of 1997. Negative environmental aspects arising from project implementation have been identified and these will have to be mitigated. The mitigation measures for the identified impacts are tackled in the management plan included herein.
